And with this simple email, Thomas, you've achieved immortality. Decades from now people will be saying, "And do you remember that email about the grounded bat?" Who will ever forget.

Hopefully in the morning I'll have something more than simple surprise to offer. But no guarantees!

Ed

Hey,

yesterday we found a grounded bat on Harvard Bridge. Does anybody know (or knows someone who knows) how to best take care of it?

We tried to get it to fly away again, but that didn't work. Because of the Blizzard we took it in a box in the basement. We wanted to get someone from wild life services or so on the line today. But because of the blizzard we can't reach anyone.. Any help would be appreciated.

Cheers  
Thomas
